Design, installation and maintenance

Using our specialist consultation and design service, Bradleys Sports Systems are designed on an individual project basis with client involvement at every stage of the process.

Outdoor systems

Offering surfaces for:

- tennis
- multi-use games areas
- football
- rugby
- netball
- futsal
- hockey

Bradleys work with top European suppliers to deliver high performing sports surfaces, installed to the highest standards.

Indoor systems

From indoor 5-a-side pitches to traditional sports hall flooring, Bradleys can design and deliver a system to suit any sports centre or school's needs. Our in-house design team use CAD technology to ensure every area is used to its full potential, often incorporating a number of different line markings for various applications.

Maintenance

Ongoing maintenance is essential to ensure performance and longevity of a surface. The Bradleys team use the latest specialist machinery to maintain all types of synthetic surfaces. Our sales team can also advise on any special works that may be required such as infill top-ups and full surface rejuvenation.

Rainwater harvesting

Designing and installing contemporary rainwater harvesting systems for domestic properties, schools and commercial buildings. A typical system would collect water via a synthetic turf lawn, store the water underground and make it available above ground via a pump. All Bradleys systems have a shallow, modular design that can be installed in any size area.

Play areas

Creating areas that are inviting, colourful and safe; from full school playgrounds, to the surrounds of play equipment and public areas. Bradleys design soft, durable areas that are easy to maintain and meet all critical fall height requirements where required. Our experience means that we can also design surfaces that can be used as an educational tool for schools and nurseries.

Synthetic turf lawns

Bradleys range of synthetic turf lawn products are a great alternative to natural lawns, decking or paving. Realistic in appearance and available in a variety of pile heights, synthetic lawns offer a low maintenance option. They are the perfect surface to be used all year round regardless of the weather and can be enjoyed safely by children and pets.
