

synthetic turf installation and resurfacing for tennis clubs

bradleys

SURFACING SYSTEMS

With over 30 years experience in synthetic turf surfacing, Bradleys Surfacing Systems offer an unrivalled understanding of the resurfacing and installation of synthetic turf surfaces. Our team's experience in installation and manufacturing gives us a unique design capability and we work closely with industry leading manufacturers and suppliers across Europe to continuously improve the materials that we specify.

Installation

A bespoke design and consultation service for the installation of synthetic turf for new tennis courts.

Resurfacing

For existing tennis courts that have deteriorated through use or lack of cleaning or maintenance and showing signs of ageing, we offer resurfacing options for all different types of services:

Upgrade from Macadam surfaces to synthetic turf:

- tufted surfaces
- synthetic clay
- needlepunch surfaces

Regular maintenance of a synthetic surface is also essential for ensuring peak performance and longevity. Regular maintenance is often a criteria for validating manufacturers' guarantees.

Bradleys offer a consultation and design service at no up-front cost to all our clients and we are more than happy to discuss any potential projects with clients in person.
