

synthetic turf maintenance for tennis clubs

bradleys

SURFACING SYSTEMS

With over 30 years experience in the manufacture and installation of synthetic turf surfaces, Bradleys Surfacing Systems offer an unrivalled understanding of maintaining synthetic turf surfaces. Correct maintenance of a synthetic surface is essential to ensure its performance and longevity. Regular maintenance is often a criteria for validating manufacturers' guarantees.

The Bradleys team utilise state of the art machinery operated by experienced staff to maintain surfaces. Ensuring surfaces:

- deliver the optimum performance possible
- have a long life
- are clean and safe for use.

A standard visit involves:

- a spray of moss and algae treatment 7–10 days prior to the main visit
- removal of dirt, debris and dust from the top layer with the SMG TurfSoft machine. The TurfSoft uses both a power brush and suction turbine to remove unwanted material from the surface, infill material is then sieved and re-applied to the surface.

Optional extras:

- application of additional infill
- seam repairs
- full surface rejuvenation.

Standard visit pricing

Tennis courts	
Single tennis court (625m ²)	£650 + VAT
Double tennis court (1100m ²)	£975 + VAT
Larger areas	Available on request

Special offer
20% discount
on first visit
